

Portray the performance of the Institution in one area distinctive to its priority and thrust

This Institution established in 1907 by the Anjuman Islam Janjira Education Trust with the motto "*Duniya Akhirat Ki Kheti Hai*" (Deeds in life count in Almighty's Court), this institution has a unique focus on the upliftment of minority communities, especially girls' education. It stands out as the sole science college offering undergraduate and postgraduate programs in science in the entire Taluka, making it a distinctive educational hub in the region.

The institution prioritizes socio-economic development, and to give back to the community, it has introduced mandatory skill development courses for students across disciplines. Encouraging active participation, students are given opportunities to organize and engage in various activities within their departments, fostering organizational skills beyond the classroom. In its commitment to making students self-reliant, the college has established institutes to enhance facilities for the student.

The institution's holistic approach to science education aims at nurturing critical thinking and providing hands-on training for comprehensive development. The introduction of new certificate courses further enriches the academic offerings. Quality education is complemented by ongoing infrastructure enhancements, including new PG buildings with a research centre, seminar hall, classrooms, and departmental library.
